Shanghai University

1.1 History

1.2 Mission, Vision and Goal

• Mission

SHU's mission is to develop talents who are physically fit and mentally strong such that they can meet future challenges and are able to serve the country and the region well.

• Vision

SHU is inspired to build a highly effective platform for "Developing Talent", "Conducting Science & Technology Research", and "Serving Society". Faculty and students can grow together in a supportive and pleasant learning environment. Through the continuous improvement of the "All-round and whole-person" education model, SHU aims at providing society our graduates cultivated with global vision, citizenship consciousness, humanity mindset, innovative spirit and practical ability to meet future challenges. SHU is pursuing standards set by the first-class universities in the world while realizing the university's core values.

• Goal

SHU aims to become the world's first class comprehensive research university with distinctive characteristics.

1.5 SHU Global–International Office

SHU Global facilitates the University's internationalization objectives, and practical initiatives to meet those objectives. It ensures inter-cultural and global perspectives are integrated into all aspects of university life, so that staff and students are well-equipped to operate in an international environment. SHU Global identifies the following internationalization focus areas:

- Build the university's network links around the world.
- Expand the international research partnerships across the globe in new and innovative ways to enhance the research performance and international reputation.
- Provide new opportunities for students to build their global skills and internationalize their learning experience.
- Support global faculty.
- Recruit international students.
